Site Preparation

In determining the location for your Megatouch FORCE Classic video game, consideration must be given to a suitable, grounded electrical outlet. Since the game is a computerized device, it should have a separate circuit, if at all possible. If a separate circuit is not available, care should be taken to provide a clean and constant voltage. As a basic guideline, never connect the unit to a circuit that also supplies power to freezers, coolers or other high power consuming and electrical noise generating equipment. Place the game in a location where nothing will interfere with proper ventilation. The game should not be exposed to any dripping or splashing liquids. Objects filled with liquid should not be placed on the

Setting up your Megatouch Game

- After removing the game from the carton, attach the power cord to the back of the game, near the on/off switch.
 Plug the game into a standard AC outlet.
- Turn the power switch at the back of the game to ON and wait for it to go through its boot-up sequence. At the completion of the boot-up sequence, the game will display the Main Menu Screen.
- The machine has been preset at the factory and therefore should not need to be adjusted, however it is recommended that the screen be calibrated (see "Screen Calibration") and the coin or bill acceptor(s) be tested.
- There are many custom settings available for the game. To customize the settings, follow the instructions beginning with the Main Menu section in this manual.

Game Description

The Megatouch FORCE Classic comes housed in a 13" countertop cabinet. This model has 3 key-locked compartments: the CPU section, the coin mech section and the coin box. The game comes equipped with a coin mech and optional bill acceptors are also available. This model also has couplers installed in the rear of the game. These are used for future hardware upgrades which include linking and modem capabilities. Enclosed in the plastic bag along with the keys and warranty card is an Ethernet cable and a crossover connector which can be used to link games. For linking information see "Linking Games" in the next section.

CPU Section

The CPU section is accessible from the rear of the unit in the countertop. This section houses the CRT, the monitor controls, the CPU and I/O boards, the power supply and the main harness. The security key is located on the I/O board.

Coin Mech/Coin Box Section

The coin mech/coin box section is accessible from the front of the unit. This section is key-locked for security purposes. A sturdy metal box located within the coin mech section, holds coins deposited into the machine. The coin box is separately locked for security.

Also located within the cavity of the coin mech are 2 internal switches, "SETUP" and "CALIBRATE," and the coin meter. Pressing the "SETUP" button will bring you to the Megatouch Setup Screen (see Figure 1). See the next section for calibration instructions.

General Care and Maintenance

NOTE: THIS GAME MUST ONLY BE SER-VICED BY QUALIFIED SERVICE PERSON-NEI

CAUTION: THERE ARE HIGH VOLTAGE PARTS IN THIS GAME. BE CAREFUL WHEN SERVICING THE INSIDE OF THE GAME. GAME SHOULD ALWAYS BE UNPLUGGED BEFORE SERVICING.

Screen Calibration

NOTE: If you are using MegaWeb™ or connecting your game to TouchTunes® product, you must enable high resolution calibration in order to properly view Web pages or activate all of TouchTunes® features. All FORCE machines, except for the Classic, can support this high resolution mode. To enable high resolution:

- Press the SETUP button inside the cabinet
- 2. Touch the "System Menu" icon on the first screen that appears.
- Touch the "Options" icon on the System Menu Screen.
- Scroll through the options until you see "Enable Hi Resolution" and touch the box next to this option so that a check appears in the box.
- A warning that it should not be enabled on Classic games will appear. If you have a Classic game, touch "No" to exit. If you have any other type of cabinet, touch "Yes" to continue.
- The game will now have high resolution enabled. Touch the "X" icon in the upper corner of the screen to exit out of setup. Then continue with the following screen calibration steps.

How To Calibrate the Touchscreen:

- Find the "CALIBRATE" button located on the control board and press it to enter the screen calibration mode.
- Touch the center of the first cross that appears on the screen. Once you release your finger, a second cross will appear.

NOTE: You must hold your finger on the cross for approximately 2 seconds for the calibration to be recognized.

- Touch the center of the second cross that appears on the screen.
- Once the second cross is touched and released, another cross will appear on the screen. To test the calibration of the screen, touch the cross with your finger and slowly drag your finger around the screen. The cross should follow your movement.
- Touch the "EXIT" icon.

If you have high resolution enabled, the game will prompt you to go through the same steps again for high resolution mode.

Degaussing Your Monitor

If your monitor is displaying "purity problems," (a display with purity problems will have parts of an all-white screen affected by blotches of color) the monitor needs to be degaussed using a "degaussing coil." A degaussing coil is a circular electromagnet, used to cancel out any stray magnetic fields that may build up on a metal object.

All of our monitors have built-in degaussing coils that are automatically activated on power-up. If your game is experiencing minor purity problems, try powering down the game for 20 minutes and then reapplying power to activate the degaussing coil. If the problem is not corrected, you will have to use a manual-degaussing coil. Follow the instructions below for degaussing a monitor.

- 1. Plug in your degaussing coil.
- Hold the coil about three feet from the monitor, press the trigger to activate the magnetic field. For circular-shaped coils, orient the coil so you see the monitor through the hole in the middle; for wand-shaped coils, point the wand towards the screen.

- Move the coil in a circular motion around the face of the monitor and slowly approach the game.
- Continuing to move the coil in a circular motion, slowly back away from the monitor.
- 5a. CIRCULAR-SHAPED COILS: When you are about three feet away, quickly turn the coil perpendicular to the monitor and release the trigger.
- 5b. WAND-SHAPED COILS: When you are about three feet away, point the wand away from the monitor and release the trigger.

Monitor Adjustment Procedure

For adjusting the colors on any of our monitor types, we suggest following the procedures described below. The vertical/horizontal controls and brightness/contrast controls are located on the monitor control panel, velcroed inside the game.

Tatung Monitors

- Set the game to the Checkerz game
- Adjust the vertical and horizontal size and vertical and horizontal position to make sure that the game screen fills the monitor screen and that the game screen is centered.
- Adjust the brightness and contrast controls until the top sets of checkers are
 a rich red and the bottom set are a dark
 gray. The feet on the "Checkerz"
 character should be white. (Adjusting
 the brightness and contrast can also
 correct for a lack of sharpness.)

General Circuit Board Handling Information

Before handling any boards, observe the following procedures:

- Prevent Electro-Static Discharge by:
 - Storing the boards in the antistatic bags in which they are shipped.
 - Removing any static charge from your body before handling the boards.
 - 3. Using a ground strap when handling the boards.
- When plugging in connectors to the board, make sure the connector is inserted straight onto the header and that the connector covers all header pins.
- Do not connect any peripheral device to the board, if the power is still connected to the peripheral or if power is already applied to the board.

CAUTION: Be extremely careful when replacing the lithium battery on the motherboard. There is a danger of explosion if the battery on the motherboard is incorrectly replaced. Only replace the battery with the same type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

Cleaning the Cabinet

 The cabinet should be cleaned with a damp cloth and mild detergent.

Cleaning the Touchscreen Monitor

 The touchscreen glass should be cleaned with a damp cloth and isopropyl alcohol or a non-ammonia cleanser.
 Do not use any abrasive or vinegarbased cleansers, as they will damage the touchscreen glass.

To gain access to the entire surface of the monitor screen on the countertop model, you will have to remove the top of the machine. To remove the top of the machine, unlock and open the rear door. Disconnect the fan power connector and disconnect the plastic tubing and ground strap attached to the lid. Press up on the spring-loaded levers located on each side of the lid. Push the lid forward and pick it up to remove. See the decal inside the lid for a diagram of locations.

NOTE: DO NOT USE ANY ABRASIVE SOLVENTS, ACID OR VINEGAR-BASED CLEANSERS ON THE MONITOR OR SIDE DECALS. OVER TIME, SUCH CLEANSERS COULD HARM THE TOUCHSCREEN AND ERASE THE DECALS. BE CAREFUL NOT TO USE COMMERCIAL CLEANERS CONTAINING ANY OF THESE SUBSTANCES.

Cleaning the Fans and Vents

- The fans and vents should be cleaned of any dust and grime on a regular basis to ensure proper ventilation of the game.
- To ensure proper operation of the game, it is important that all fans are operating correctly and that the airflow is unobstructed. Make sure nothing is placed inside the cabinet or next to the fan vents that would inhibit the flow of air. Also, if any fans are not operating, it is important that they be replaced.

Linking Games

Some games include an Ethernet cable and a crossover connector used to link games together. By linking your games, players can play compete against one another in real-time interactive play. Follow the instructions below to link your games. The software will allow up to 8 games to be linked.

NOTE: One Ethernet cable is required for each game you are linking. Additional Cat-5 UTP RJ45 Ethernet cables can be purchased at your local computer store.

- 1. Turn off and unplug the games.
- Connect one end of the supplied Ethernet cable to the Ethernet connector on the outside of the game. The Ethernet connector is the one on the left if you are facing the back of the game. (If you are linking a Vibe or EVO, the Ethernet connector is the on the right.)
- Connect the second Ethernet cable to the Ethernet connector on the outside of the second game.

NOTE: If you are linking games to a Combo Jukebox or a MegaTunes unit, the free ends of the Ethernet cables from the games will connect directly to the Ethernet ports on the jukebox or MegaTunes unit. If you are linking more than 2 games and a jukebox, or more than 3 games and a MegaTunes, you will need to connect an Ethernet cable to the hub connector on the jukebox or MegaTunes unit and plug the free ends of all of the cables into a hub.

MegaTunes: The Ethernet ports are located on the Ethernet hub mounted to the single board computer (SBC). The 4 ports on the right are all for Ethernet, the port on the left is for connecting a hub only. Loosen the 2 thumbnuts securing the front access panel. Connect the Ethernet cable to one of the Ethernet ports and replace the front access panel routing the cable through the slots at the bottom of the access panel.

Combo Jukebox: There are two available Ethernet couplers, labeled "Mega-Link", on the upper left if you are facing the back of the jukebox.

- Linking two games: Plug the free ends of both the Ethernet cables into the crossover coupler.
 - Linking more than two games: Pug the free ends of the Ethernet cables into a 10 BASE-T Ethernet hub (available from your distributor as a separate part number (EC0030-01), or at your local computer store).
- Plug in the games and turn on the power.
 If installation was successful, you will see a Mega-Link® button displayed on the screen after the menu appears.

NOTE: The Mega-Link® icon will appear on the game only when 2 or more games are linked.

NOTE: If a MegaTunes unit has been linked to a game, the music will be downloaded to the game. This download time will vary depending on the amount of music being downloaded.

NOTE: Megatouch games that are connected using the Mega-Link™ system must have the same level of software for proper operation. The software is designed to detect other levels of software in linked games. If a different level is detected, you will receive a screen that says, "MEGALINK MISMATCH CALL ATTENDANT." This screen will be displayed approximately 5 minutes after you turn the games on. To clear the screen and continue playing the games, you must turn the power off, unlink the games, and turn the power back on again. If you want to link these games you must upgrade all games to the same software level.

Game Name and Score Needed for Initial Replay

Solitaire, Power Solitaire, Lone Star, and Super Lone Star will always offer a replay once the listed score is attained. The other games have to reach the score listed as well as attain the high score for the game in order to offer a replay. **NOTE**: The available games may vary.

Credits/Pricing Menu

Quick Price Setup

Quick Price Setup allows the operator to make general pricing changes without entering the Games Menu.

FIGURE 2 - QUICK PRICE SETUP SCREEN

3 Credits for a Dollar: Sets each game to the following price settings:

COIN INPUT	COIN VALUE	COINS	=	CREDITS	&	METER PULSES
1A	25¢	2		1		2
2B	25¢	3		2		3
3C	25¢	4		3		4

NOTE: If the game is set to 3 Credits for a Dollar, prices will be displayed in credits unless otherwise specified.

4 Credits for a Dollar: Sets each game to the following price settings:

COIN INPUT	COIN VALUE	COINS	=	CREDITS	&	METER PULSES
1A	25¢	1		1		1
2B	25¢	1		1		1
3C	25¢	1		1		1
6F	\$1	1		4		4

TouchTunes Bonus Credit Option: Sets jukebox credits to the following settings on the Megatouch Combo Jukebox or MegaTunes unit:

COIN INPUT	COIN VALUE	COINS	=	CREDITS	&	METER PULSES
1A	25¢	1		1		1
2B	25¢	2		2		2
3C	25¢	4		4		4
4D	25¢	8		10		8
5E	25¢	20		26		20

To see the TouchTunes credit settings, enter the Coin-In Menu after touching the TouchTunes Bonus Credit icon.

Most Games 1 Credit: Sets the cost of all games to 1 credit except games with a default setting of 2 credits, which will remain at 2 credits.

Most Games 2 Credits: Sets the cost of all games to 2 credits except games with a default setting of 2 credits, which are then set to 3 credits.

The operator can also use this screen to determine whether prices are displayed on-screen as credits or monetary amounts. Default values are restored with the Factory Settings icon. Touch the "?" icon for more information.

Coin-In

To Enter The "Coin-In" Screen, Touch "Coin-In" on the Credits Menu

Game cost can be controlled two ways: by changing the number of credits required to play a game or by changing the cost of a credit. The Coin-In Menu allows you to adjust the cost of a credit, as well as providing a way to give players "bonus" credits for depositing a higher amount of money.

When programming the Coin-In Menu, Channel 1 is set for the lowest value coin, Channel 2 for the next highest value, etc. If all six coin inputs are not used, the unused inputs must be set to "N/A". Adjust the coin/credit/meter pulse settings by touching the up and down arrows on the field you want to change.

COIN INPUT	COIN VALUE	COINS	=	CREDITS	&	METER PULSES
1A	10p	3		1		3
2B	20p	3		2		6
3C	50p	1		2	player premium 25p/credit	5
4D	1£	1		5	player premium 20p/credit	10

In the above example (UK currency), each game costs one (1) credit and the cost for a single credit is 30p. This method is preferred if you want game cost to always be reflected as "1 credit."

COIN INPUT	COIN VALUE	COINS	=	CREDITS	&	METER PULSES
1A	10p	1		1		1
2B	20p	1		2		2
3C	50p	1		6	1 bonus credit	5
4D	1£	1		15	5 bonus credits	10

In the above example (UK currency), the cost of a credit is set to 10p and each game costs 3 credits (for a total of 30p). This method allows game cost to be increased by the smallest unit of currency used (e.g. increasing the cost of Solitaire to four (4) credits would increase the game cost by 10p).

In both examples, note that meter pulses are independent of credits and only track the unit of currency (10p in the examples). Players are given an incentive to deposit more money by giving them "bonus" credits for depositing 50p or £1. Coins may be deposited in any combination of values and the game will automatically register the highest number of credits for the total amount of coins deposited. Once a game is played, any remaining fractional credits are erased.

Generally, most countries have a factory default setting. This setting can be adjusted (as described above), but will return if the game memory is cleared. Some programs, depending on the key used, have a currency default display located to the left of the coin inputs. It shows the currency value for each of the coin inputs. This display is used as a guide and is not used in any calculations. Touch the currency default display to hide/show the display.

Coinless Coin Op Menu (FORCE Games Only)

When enabled via the Options button on the Credits/Pricing Menu, the Coinless Coin Op feature allows the operator to charge on a per-game or per-time basis without players inserting money into the game. The total amount owed after gameplay is tallied by the machine and collected by the location owner. Location owners reset the game with a PIN after collection.

FIGURE 3 - PLAYER MENU IN COINLESS COIN OP (TIME AND PER GAME MODES BOTH ENABLED)

Certain features will not be available in Coinless Coin Op Mode, such as MegaNet® content, Merit Money, Promo Credits, Free Credits, TouchTunes® music, and pricing can only be displayed in currency values, not credits.

Settinas

Touching the Settings icon allows the operator to choose whether players can play Per Game, Per Time, or both when the game is in Coinless Coin Op mode. Per Time pricing can be changed on this screen with the up and down arrows. The currency amount will apply to each 15-minute time block selected by the customer.

Setting the PIN

Touch the Set PIN button on the Coinless Coin Op Menu to program the PIN. The number can be from 1 to 5 digits.

FIGURE 4 - COINLESS COIN OP MENU - SETTINGS SCREEN

NOTE: The Coinless Coin Op PIN can also be set from the Player Menu after touching the Options button, entering the 6 Star PIN, and touching the CCO Set PIN button.

Disabling the Money Inputs

It is recommended that the money inputs be disabled when the game is in Coinless Coin Op mode. Unplug the power and signal harness connected to the bill/note acceptor and the harness connected to the coin mech (if applicable) to disable the inputs.

Per-Game Mode

When players choose this mode, a running total of the amount owed is maintained and displayed in the CREDITS box on the screen. The total is incremented after each game or function. The location owner then collects the total amount owed at the end of gameplay. If there is no activity for 10 minutes, the machine will disable and the amount owed by the player will display on screen. No further gameplay can occur until the machine is reset by a location employee using the PIN.

Time Mode

The price per 15-minute time block will be displayed before players choose this mode. During gameplay, the time remaining and amount owed by the player will be

displayed on screen. When the time block runs out, players can purchase additional time. Otherwise, the machine will disable and the amount owed by the player will display on screen. No further gameplay can occur until the machine is reset using the PIN.

If the player leaves the game before the purchased time block has ended, the game can be reset using the PIN.

FIGURE 5 - COINLESS COIN OP -TIME EXPIRED SCREEN

Resetting or Freezing the Game

The game can be reset at any time using the pre-programmed PIN. Once gameplay totals have been tallied by the machine, the attendant can also choose to freeze the game to prevent more activity until the transaction is complete. The Reset or Freeze buttons are accessible through the Options icon on the Player Menu after touching the Coinless Coin Op button. An alarm will begin to sound after 3 failed attempts to enter the valid number when entering the PIN to reset the game. The alarm will terminate when the machine is rebooted, the operator SETUP button is pressed, or the correct PIN is entered.

Rental Mode

When enabled via the Options button on the Credits/Pricing Menu, Rental Mode allows players to purchase a block of time and use that time to play as many games as they want.

To set the value of a credit in Rental Mode, select Pay Per Time from the Credits Menu. Touch the arrows on either side of the time interval to adjust the number of minutes of play given for each credit. To disable any row, set the minute value to zero.

To Enter This Screen, Touch "Pay Per Time" on the Credits Menu

FIGURE 6 - CREDITS/PRICING MENU: PAY PERTIME SCREEN

Certain features will not be available in Rental Mode, such as Merit Money, Promo Credits and Free Credits. Rental mode is also unavailable with linked games.

NOTE: It is recommended that you clear the books when toggling Rental Mode on and off in order to ensure accurate bookeeping.

Games Menu

Game Setup

The game list and prices, as well as game options, are programmed using these screens. The first screen shows the various game categories and allows access to the following general settings for all games.

To Enter This Screen, Touch "Game Setup" on the Games Menu and Select a Category

FIGURE 7 - GAMES MENU: GAME SETUP

Factory Default Games Into Menu: Returns the Game Setup to its default settings. Games that were not originally enabled will be turned off and all price settings will be reset.

When you touch a category name, the next Game Setup Screen shows the game positions available for that category and the price for each game, with the list at the bottom showing all games available for the selected category. In categories with Merit-thon games, players who choose Merit-thon play one round of three different games in that category for one combined score.

The Game Setup Screen also allows you to make these general changes:

Default Games: Resets the selected category menu to its default game and price settings.

Enable All Games: Turns on all games within the selected category and defaults the price settings.

Clear One: Clears a selected item from the player's game menu.

Clear All: Clears all games from the player's game menu.

To customize a particular game list, first select a category on the first Game Setup Screen. On the second screen, touch Clear

All to clear the game list. Choose the menu position you want a particular game to occupy by touching that position, then touch the desired game name from the game list on the bottom of the screen. Repeat until all desired games appear in the menu (a game cannot appear in a game list more than once). Games already displayed in the menu will be red in the game list at the bottom of the screen.

To adjust the price, touch the credit value next to each game. Each touch will rotate the price from 25¢ (1CR), to 50¢ (2CR), to 75¢ (3CR), to \$1 (4CR), to \$1.25 (5CR), to \$1.50 (6CR), to \$1.75 (7CR), to \$2 (8CR), and back to 25¢ (1CR).

FIGURE 8 - HI SCORES MENU: VIEW/CLEAR HI SCORES SCREEN

Touch "Clear All" to remove all hi scores for that particular game or select an individual score and touch "Clear One" to remove that particular score only.

Books Menu

The Books Screens display the current and lifetime credit totals for each game, as well as the percentage of credits played per game (the percentage for each game is the total number of credits played on that game divided by the total number of credits entered into the machine).

Books Display

To Enter This Screen, Touch "Books Display" on the Books Menu

FIGURE 9 - BOOKS MENU: BOOKS DISPLAY SCREEN

The books information can be sorted in three ways with the button that toggles through the sorting categories. "Unsorted" displays the books information in the standard order. "Sorted by Current" displays the current credits for each game from most to least played. "Sorted by Lifetime" displays the lifetime credits for each game beginning with the most played game.

Touch TOURNAMAXX STATISTICS or TOURNAMENT STATISTICS to get the books information for that play only. Touch CLEAR CURRENT to erase all current books data. The date the data was last cleared will appear at the top of the Books Screen.

To Enter This Screen, Touch "Books Display" on the Books Menu and Choose a Game Name

FIGURE 10 - BOOKS MENU: BOOKS DISPLAY SCREEN WITH GAME SELECTED

Touching a game name will display the current and lifetime credit totals*, broken into 1-4 player totals and linked game totals. It also shows the shortest, average, and longest playing times for that game.

*Touching Trivia or Power Trivia displays totals by category.

Books Display also shows coin input data, as well as Promotional Credits, Merit Money, and Coinless Coin Op totals (when these features are enabled). Touch Total Coins to display individual coin input statistics and MegaNet® Credits to display the totals for each MegaNet® category.

NOTE: Books data can be exported to a file USB pen or PCMCIA card via the System Menu/Data Transfer/Export Books feature. The .dat file can then be viewed with a word processing program after connecting the storage device to a personal computer. The file will display basic game information such as the software version, the game serial number, and date/time information relating to books data. The file will also show the current and lifetime credit totals, as well as credit totals for each game featured on the machine.

Cash Settlement Setup

The Cash Settlement Screens are used to calculate the percentage of earnings the operator and location will receive, as well as any fees collected by the operator. This will help to offset MegaNet® operation costs.

To Enter This Screen, Touch "Cash Settlement Setup" on the Books Menu and touch "NEXT"

FIGURE 11 - BOOKS MENU: CASH SETTLEMENT SETUP SCREEN

The first screens allow you to set up the Cash Settlement Screen. Choose YES or NO to display the operator's cut on the Cash Settlement Collection Screen and enter the percentage of revenue the location will receive. Also, select the fee calculation method. Select per month if you do not make regular weekly collections or per week if you collect every 7 days. Then touch "NEXT".

NOTE: Monthly fee collections are based on 4.3 week month. If you change your fee calculation method, the game will auto adjust the fees by multiplying or dividing by 4.3 and rounding to the nearest penny.

NOTE: Make sure the time and date are set on the game in order to ensure correct fee calculation.

The next screen allows you to set up the fees. The amounts can be changed on screen by touching the amount itself and using the keypad to enter a dollar figure. The other two columns display the cumula-

My Merit (FORCE Games Only)

The My Merit feature allows individual players to create custom accounts, accessible via PIN numbers. Accounts can be created by touching the My Merit button on the Player Menu or by accepting the option to create an account after achieving a Hi Score.

FIGURE 22 - MY MERIT OPTIONS

Players will then have the choice to log in to their accounts through the My Merit button on the Player Menu and have personal data stored on the machine. Players can view their hi scores and the number of games they've played in the My Merit mode for the last year.

NOTE: My Merit data will be cleared when a software update is performed. Be sure to back up the data before updating the game.

View Player Data

Touching View Player Data after selecting My Merit from the Promotion Menu will bring up a list of all players with My Merit accounts. Touching a player name will bring up the player's PIN, the total number of games played, and the date the account was created. The Show Hi Scores button will display a list of the games on which the player has the hi score and the score itself. The operator can also reward the player with free credits on the View Player Data screen if desired.

Show Game Play Frequency

This feature shows the number of games played by each My Merit player. The operator can choose whether to display all totals or just those that fall within a certain date range.

Show Player Hi Scores

Selecting a game name under this feature will bring up the Hi Scores of each My Merit player for that game, as well as the date the score was achieved. The operator can choose whether to display all Hi Scores or just those that fall within a certain date range.

Backup/Restore

My Merit data can be backed up or restored with a USB pen. After connecting a pen to the machine, touch this button to proceed with backing up or restoring all My Merit data. USB pen kits (kit number KAV-100-008-01) are available. To order, contact your local distributor.

NOTE: Restoring My Merit data from a storage device will erase any My Merit data currently on the game.

Merit Money

The Merit Money screens allow location owners to encourage game play by offering free games (not free credits) at certain time intervals via the 6 Star feature. Select days of the week, time frames, and the number of free games (1-10 per day) to be awarded, as well as a PIN number for location owners to use in order to access Merit Money using the 6 Stars feature. Location owners can enable Merit Money by entering that specific PIN in the 6 Stars screen. One free game is given away each time the location enters the code until the predetermined daily limit is reached. Free games expire after 10 minutes, when money is deposited into the machine, or when the Merit Money time period comes to an end.

Promo Credits

The Promo Credits feature generates interest by offering operator-controlled free credits while the game is in idle mode. Select days of the week, time frames, idle time (number of minutes the game would be in idle mode before free credits are offered) and the number of credits (1-10) to be awarded. A message announcing that free credits are available will appear on the screen during idle mode when Promo Credits go into effect. Promo Credits expire after 10 minutes or when the Promo Credits time period comes to an end.

DIP SWITCH SETTINGS

The following table provides information on the functionality of the hard DIP switches in Megatouch games. Make sure to read the information in the "Notes" column to determine what is affected when performing these functions. After performing any DIP switch function, make sure to follow the instructions on the screen. In most cases, you will be instructed to reset the DIP switch in order to reboot the game. If you fail to reset the DIP switch before rebooting, it could result in corruption of the hard drive.

NOTE: In FORCE 2005 and Jade software, the DIP switch functionality is built into the software. To access the DIP switches through the software:

Turn off the game. Set DIP switch 1 to the closed position. Turn power on. When the message "Please reset DIP 1 to proceed" appears, reset DIP 1 to the open position. The Merit diagnostics page will appear. Touch "?" for information on DIP switch functionality. Touch the specific DIP switch to activate it. Touch "X" to exit.

8	Motherboard configuration & checksum test	Configures the CMOS settings on the motherboard to Merit specifications and checks the files on the hard drive. A checksum test should be performed when the game is locking up or rebooting. If the test fails, the program should be reloaded onto the hard drive. After reloading, perform another checksum test. If it fails again, the hard drive should be replaced.
6	Hardware configuration	 Identifies system hardware and configures the motherboard. A hardware configuration occasionally needs to be performed after a kit is installed and the touchscreen is not responding to touch or the calibration is off.
5 & 7	Memory clear for TournaMAXX™ and TouchTunes®	 Clears the login name, password, access phone number, and all call-in settings for TournaMAXX™ users. Clears all the loaded albums for TouchTunes® users. Clears current books, coin-in, high scores and resets the software options. A memory clear should be performed when a game is not able to connect to TournaMAXX™ and there is some question about the information in the Dial-Up Network Screen being correct. After performing a memory clear, TournaMAXX™ setup information must be re-entered, and an "Update From Server" should be performed. NOTE: TournaMAXX™ games must perform an "Update From Server" BEFORE performing a memory clear.
4 & 7	Complete memory clear	 Clears ALL memory on hard drive including the TournaMAXX™ player database, TournaMAXX™ settings, advertising screens, bookkeeping, high scores, coin-in, options, etc. It resets the game to the factory defaults. It also marks bad sectors on hard drive. A complete memory clear should only be performed when the game is locking up or resetting and it has passed the checksum test. After performing a memory clear, the player database should be reloaded, TournaMAXX setup information must be reentered, and an "Update From Server" should be performed. NOTE: TournaMAXX™ games must perform an "Update From Server" BEFORE performing a complete memory clear.
3	Watchdog Timer (EVO & Fusion games)	When the watchdog timer is enabled, it will reboot the machine within 2 minutes of a failure, allowing the game to automatically reset itself if a problem arises.

CONNECTING A PRINTER (GERMAN GAMES ONLY)

To connect a printer to the game as needed:

- 1. Unlock and remove the coin box or coin box/bill acceptor assembly.
- 2. Locate the printer port behind the coin box next to the SETUP and CALIBRATE buttons.
- 3. When the game enters idle mode, connect the printer to the printer port on the game.

NOTE: Some printers may cause the game to reboot. Once the game has rebooted and entered idle mode, the printer will begin printing. Do not disconnect the printer until it is finished printing.

Um einen Drucker an eine Maschine anzuschliessen:

- Oeffnen und entfernen sie den Muenzbehaelter oder Muenz/ Geldscheinbehaelterkombination
- Lokalisieren sie den Druckeranschluss hinter dem Muenzbehaelter bei den SETUP und CALIBRATE Knoepfen.
- Wenn das Geraet in den Leerlauf uebergeht, den Drucker am Druckeranschluss des Geraets anschliessen.

BEMERKUNG: Bei bestimmten Druckern rebootet das Geraet. Nachdem das Geraet dann in den Leerlauf uebergeht, beginnt der Druckvorgang. Den Drucker bitte nicht abschalten bevor der Druckvorgang beendet ist.

NOTE: In order for your Megatouch FORCE game to function properly, the hardware must only be replaced with FORCE hardware. Replacing the motherboard, I/O board, hard drive or touchscreen controller with hardware that is not specific for FORCE will eliminate some of the FORCE software features.
