WITH CPU SECTION OPENED

<u>IMPORTANT</u>
<u>ENTERTAINER CONNECTION INFORMATION</u>

If you are installing an Entertainer unit, you must make a successful connection to Merit's server in order for the unit to function. See "AMI Music Setup" in your owner's manual for information on how to set up your game to connect to the server.

If you attempted to connect, but cannot make a successful connection due to a server error, your game will still operate for 3 days. However, your game must connect within those 3 days or it will stop working.

Remember:
In order for game functionality to continue, you must connect once every 5 days.
NOTE: Once you have made a successful connection, the game will automatically attempt to call in call in every day by default.
